

## **CCT® The Eye of the Storm Book review**

**“CCT® The Eye of the Storm is an exhaustively researched and surprisingly well-composed history of those warriors to which the glitter and glory of the news stories and Hollywood movies takes back seat to the knowledge of a job well done.**

**It is the story of the 'operators' who tiptoe through the enemy's backyard and sit on their lawn furniture whilst calling in a strike on their house. There are many true heroes in any conflict, and CCT® The Eye of the Storm manages to shift one's focus to the warriors who are behind the lines even before the lines have been drawn.**

**Congratulations on the creation of a masterpiece Gene, and shame on you for sending to me a book that I absolutely cannot put down!**

**With very best regards,”**
